

RE: Save all EEPROM values from a radio into a file using Commtel

The steps below show how to save all EEPROM values from any of Lexycom's SDRs into a file.

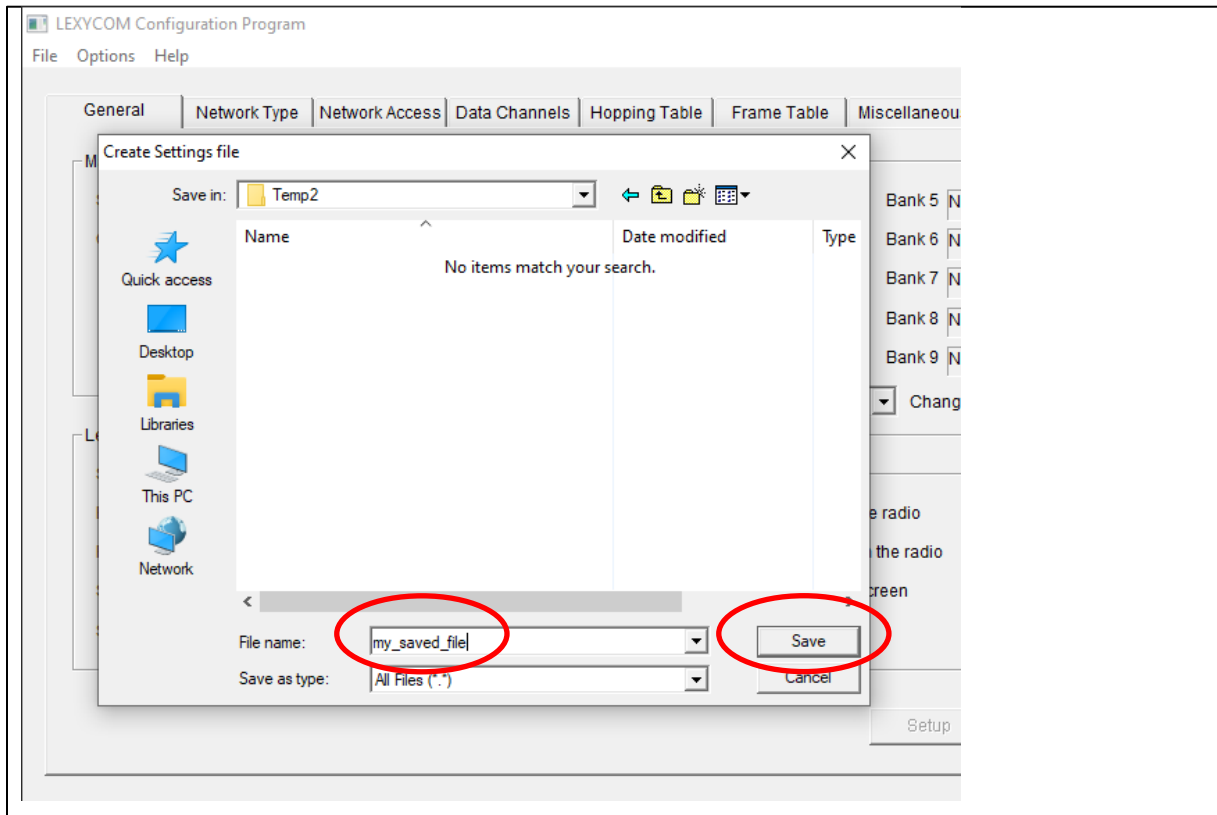

1. Start the Commtel s/w; establish its communication with the radio.
2. Select "File" on the Commtel's top menu

3. Select "Save all settings to a file.." from the submenu.

4. Commtel will prompt you to select a file name to save the EEPROM settings into. When done, click "Save".

Once done, you can power cycle the radio or continue its configuration using Commtel.
